

Beitou Grand View Resort

The renovation of Banquet Hall of Beitou Grand View Resort has changed its lighting system. The PAR cans were replaced by LED strips, and down lights remain controlled by DMX system. As for the new LED strips, the latest Orbit (PLC) lighting control system is applied. By using PL-DP102II, which is the interface of DMX to Orbit (PLC), the two systems can work together just perfectly.

Product list:

Model	Description
DP-NEX1	NEX central controller
PL-DP102II	DMX to ORBIT (PLC) Interface
PL-NF120	ORBIT(PLC) Filter
CERES	1CH C.V. LED dimming module
ECP-202	Control panel
