

# Lighting Design of Shangri-La Hotel, Changzhou

Written by Lite-Puter Technology Co., Ltd.

Equipments : Lite-Puter Lighting Control System

## **Safety, environmental protection and energy conservation**

Shangri-La Hotel, Changzhou is the first international 5-star hotel in Wujin, which is ideally located in the new development area of Wujin, within the Hi-tech Industrial Park, and adjacent to the newly built international residential community. Shangri-La Hotel, Changzhou offers 350 elegantly appointed guestrooms and suites, 5 restaurants as well as banquet halls and conference halls with a minimum floor space of 2,500 square meters, including a large ballroom without pillars and 7 multi-function halls. The hotel is always committed to safety, environmental protection and energy conservation, thus, Lite-Puter intelligent lighting control system is specially applied to meet the commitment.

### **Fashionable Intelligent Illumination**

Besides scene, dimming and switch function, the lighting control system in Lobby Lounge is also equipped with timing function including Astronomical timing and Calendar timing, which is able to control lighting according to sunrise and sunset.

The lobby lounge features French windows with panoramic views of the Lake Xihu. On 31<sup>st</sup> of Dec. every year, New Year's countdown Carnival is held in the lobby, which is full of perfect effect of lighting and sound. Therefore, it is turning to be the first choice of group lovers' activity and New Year's party.

Shangri-La Hotel, Changzhou hosts the finest restaurants, such as Café Long (buffets), Shany Palace (Chinese cuisine), Nishimura (Japanese cuisine), Lobby Lounge and Bar WJ. Lite-Puter lighting control system is adopted to create the different dining atmosphere by changing lighting effect.

The banquet room located in the second floor equips with the cutting edge facilities. The space can be divided into many rooms according to the different demand and the lighting effect presents according to the different rooms, time and function. Lite-Puter lighting control system can be used in the place with flexible partitions. When the rooms are partitioned off, panel in each zone can independently control each room. When the partitions are eliminated, the control panel can do master control of all the channels in the area.
