Application: Lite-Puter Lighting Control System

The First Cultural and Creative Vacation Hotel in the Mainland of China

The Lalu, Qingdao is located on the long peninsula in district Hangdao, Qingdao, and the peninsula is 1km long from south to north, over 900m wide from east to west, against Mt. Phoenix, surrounded by sea on three sides. The primitive rock, beach, coastline, and unique local abalone pond remains on the peninsula.

The Lalu, Qingdao is the first cultural and creative vacation hotel for Shining Group in the mainland of China, which is the first super five star hotel. Total basement area is about 141,500m² and total floor area is 145,000m², total investment of the project is nearly five hundred million dollars. The Lalu is including 160 suites of rooms, 41 sea villas, 30 sea duplex villas, international conference center (ICC) which contains over 80 tables, top banquet hall, Chinese/French/Japanese/Italian restaurant, Exquisite Square, wedding church above the sea, outdoor swimming pool, Lalu SPA, gyms, hot spring and luxurious vacation facilities.

The LALU of Qingdao and Taiwan

The LALU, reminds people of famous LALU, Sun Moon Lake of Taiwan, which can represent super star hotel in Taiwan in the international vacation hotels. LALU has occupied Sun Moon Lake for over one century. In 1901, Mr. Ito, a Japanese national, built a wooden chalet on the present Hanbi Peninsula as a vacation home and named it "Han Bi Lo". In 1923, the Japanese Crown Prince Hirohito made an inspection tour to Taiwan and selected the "Han Bi Lo" as his retreat. In 1949, the Nationalist Government withdrew to Taiwan and the LALU was converted into a retreat for late President Chiang Kai-shek. The building was used as vacation lodging and for the reception of foreign heads of state. The LALU is a well-known brand of super star vacation hotel, therefore, a large amount of riches from all over the world are attracted to go there for their holiday. Thus, it is estimated as 'the most yearning vacation resort'.

Another Ultimate Artwork from International Designer

The LALU, Qingdao was designed by Kerry Hill, the world-renowned architect from Australia. His architectural designs can be found in Southeast Asia, Australia, Japan, and America, and his specialty is the design particularly on exclusive resort hotels such as the LALU Sun Moon Lake in Taiwan, Amankora in Bhutan, The Datai in Malaysia, Amanwa, Amanumi, Aman at Cypress Hyogo in Japan, Amam, Gocek in Turkey, Aman New Delhi in India, Aman, Dibbeen in Jordan, Aman Resort, Cavtar in Croatia, The Chedi, The serai in Indonesian, Amanusa in Bali, The Cbedi in Chiangmai, Thailand and Desert Palm in Dubai etc, which are highly evaluated by the global well-heeled shoppers.

Kerry Hill refers to the architectural form of the Lulu as “Ongoing Style” which connotes a unique “progressive” style. This architectural style appears fresh and new and is characterized by a high intrinsic value even after 10 or 20 years. Besides extreme simplicity and Zen style of LALU, Taiwan, Shandong culture and literature creation element is poured in it. Everything but the beams, pillars, and floor planks of the original six-story palace-like structure was removed and renovated. The building was divided into three wings based on the different purposes. Wing A houses the guest rooms, while Wing B offers recreational facilities such as the SPA, gym, and Members Club. Wing C contains the villa area, conference facilities, a library, and a parking lot. The hotel presented itself to its guests with a brand-new look and vacation ambience on March 3, 2002. Delicate layout and smart idea makes Lulu unique and elegant, therefore, the lulu, Qingdao maybe lead tourism to exquisite vacation era.

Lite-Puter: New model of Intelligent Hotel

The hotel intelligent facilities in Lulu are top class in domestic hotels, which can be the model of intelligent hotel. For example, the TV in the guestroom can control the air conditioner, curtain and lights, also, TV menu, reservation service and audio/video entertainment can be offered in room. Intelligent TV of ‘smart e-room’ interprets guestroom intelligence in Lulu with extreme way, and explains the concept of hotel intelligence for Lulu, moreover, the guest here will feel the future intelligent life.

The whole intelligent control in charge is global famous brand Lite-Puter intelligent control system, and the application site contains the public area in Lulu (e.g. ICC, top banquet hall, Chinese/French/Japanese/Italian restaurant, Exquisite Square, wedding church above the sea, gyms,), all suites and Presidential suites.

Lite-Puter products used in public area are mainly EDX-1205/EDX-1210 series (12CH/DC 0-10V integrated dimmer pack), and its features are 12CH removable type design, hot plug design without

changing module when power off so as to satisfy the special demand of 24-hour-opened hotel. The other function: can set dimming /switch/0-10V analog (LED) mode, can set dimming curve due to the lamp type, overheat protection/temperature control fan, etc. With appointed product glass touch panel by the special-designed hotel, functional hotel guestroom control system is harmonious, and with fine touch operation, the desired effect comes from over 30 year hotel control experience.

Every revolution and transformation of Lalu attract everyone and present fashion. Maybe after a hundred years, when later people write another one hundred years of Lalu history again, the Lalu of Sun Moon Lake, Qingdao, Nanjing and Chengdu will turn their leading role. In the stream of history, Lalu is already a part of eternity.
